

IN THE DRAWINGS:

The specification was objected to because the reference number for pump sun gear 23 identified in the specification does not match the element identified by reference number 23 in Figure 3.

Applicants hereby submit a Replacement Drawing Sheet for Figure 3 (attached hereto) in which the lead line for reference number 23 has been corrected to point to pump sun gear 23. An Annotated Drawing Sheet Showing Change for Figure 3 is also attached hereto. Accordingly, reconsideration and withdrawal of the aforementioned objection to the specification is respectfully requested.
